Why making it with Patons makes it really worthwhile...

Every year Patons makes up thousands and thousands of garments to ensure that each individual pattern is perfected in every size stated and every Patons yarn specified — of vital importance to the shape of your finished garment.

And once in shape — always in shape. No shrinking. No stretching. Patons promise it. With over 180 years of experience to draw on, the people at Patons don't pay lip service to quality, they work at it constantly. That's why making it with Patons makes it really worthwhile.

PATONYLE

A light-weight, versatile yarn, easy to knit or crochet — 80% wool with 20% Nylon added for extra strength and resilience. Moth-proofed and Patonised to resist shrinking.

EASYCARE BRI-NYLON

A 100% Bri-Nylon yarn that is simple to wash, quick to dry, and long, long wearing. Moth-proof, and shrink-proof.

Variations in specified yarn quantities for garments.

Knitters occasionally comment that the quantity of yarn recommended for a garment varies from the amount they actually use. One major reason for this is that no two people knit or crochet in exactly the same way.

When we specify a quantity of yarn for a particular garment, we are stating a figure that is the end result of having each individual design made by as many as six different knitters. The average quantity determined by this check knitting is regarded as the most satisfactory figure for that particular garment, knitted at the **correct tension*** to the measurements specified and in the actual yarn recommended. Naturally, if you decide to change the body or sleeve length you must allow for an adjustment to the quantity of yarn.

***Correct tension**—see tension instructions for each garment.

WASHING INSTRUCTIONS

BEFORE WASHING—Make any needed repairs. Remove any unwashable buttons or trimmings, close zip and **turn garment inside out**.

WASHING—do not pre-soak as is recommended with some detergents containing enzymes. Washing powders approved by the Australian Wool Board should be used for woollen garments. A mild detergent should be used for cotton or synthetic garments.

Powder should be fully dissolved in warm (**not hot**) water before immersing garment. Squeeze the garment gently in the suds; do not rub.

A heavy soil mark can be treated before washing the whole garment by damping the area and pressing in some powder with your fingers.

RINSING—Rinse garment thoroughly in warm (not cold) water, until the water is clear. Support your garment with both hands whenever you lift it to prevent stretching.

DRYING—After the last rinse, spin dry the garment or squeeze it between towels to remove excess water. Dry naturally on a flat surface out of direct sunlight. **Never hang a hand-knitted garment**. When drying colour-contrast knitteds, do not leave contrasting areas in contact with each other in the wet or damp state.

PRESSING—**Never press synthetics**. Generally, woollen or cotton garments should be pressed with a warm iron and a slightly damp cloth.

On sewing days - use only Coats Drima

Sew by hand or machine—confident that multi-purpose Coats Drima will take the strain on any fabric.

Coats Drima is strong because it's spun polyester, finer because polyester's so strong. Stitches almost invisible so it's easier to match fabric colours (though there's a wide colour range). Has inbuilt elasticity that flexes with

stretch fabrics. It's rot-proof, so ideal for zones such as underarm seaming. No problem to iron, but do avoid using your iron at very high temperatures. Extreme heat isn't good for your fabrics anyway.

Drima is quality consistent to ensure easier needle threading, smoother sewing. 2 Spool sizes: 100 and 300 yards.

SOME IMPORTANT HINTS

CROCHET TENSION TEST

Before you start your garment take the yarn and hook specified in the instructions and make a chain 4 or 5 inches (10 or 13 cm) long. Work 1 square in whatever stitch is mentioned in the Tension paragraph of your instructions. With pins, mark out the number of stitches (or patterns) and rows quoted in the Tension. With an inch tape, measure the distance between the pins and compare with the tension given in the instructions. If your tension is too loose (i.e. if the piece measures more than the measurement given), try a size finer hook. If your tension is too tight (i.e. if the piece measures less than the measurement given), try a size larger hook. If more than one size of hook is recommended in the instructions and you have altered your hook to correct the tension, corresponding alterations must be made to hooks throughout the instructions.

ABBREVIATIONS used in CROCHET

Ch.—chain. sp.—space. s.c.—single crochet. sl.st.—slip stitch. d.c.—double crochet. y.o.h.—yarn over hook. h.tr.—half treble—pass yarn round hook, draw a loop through next ch., draw a loop through all 3 loops on hook. tr.—treble—pass yarn round hook, draw a loop through next ch., draw a loop through first 2 loops on hook, then draw another loop through 2 remaining loops. d.tr.—double treble—pass yarn twice round hook, draw a loop through next ch., draw a loop through first 2 loops on hook, draw a loop through next 2 loops, then another through last 2 loops. t.tr.—triple treble—pass yarn three times round hook, draw a loop through next ch., draw a loop through first 2 loops on hook, draw a loop through next 2 loops, then another through next 2 loops, then another through last 2 loops. cm—centimetres.

CRAB STITCH

Pressing Crochet

It is not necessary to press most crochet stitches, as pressing tends to flatten the appearance of the stitch. However, if pressing should be necessary, this should be done very carefully, from the wrong side of the work. Use a damp cloth and warm iron, and do not let the full weight of the iron fall on the garment—steam, rather than press. **Synthetic yarns should not be pressed at all.**

ABBREVIATIONS used in KNITTING

K.—Knit. P.—Purl. sts.—stitches. tog.—together. alt.—alternate. p.s.s.o.—pass slip stitch over. ins.—inches. rep.—repeat. inc.—increase or increasing. patt.—pattern. t.b.l.—through back of loop. beg.—beginning. dec.—decrease or decreasing. incl.—inclusive. y.fwd.—yarn forward. y.r.n.—yarn around needle. y.o.n.—yarn over needle. y.bk.—yarn back y.ft.—yarn front. cm—centimetres.

Garter Stitch—every row knit. When instructions read: "Cast off 2 stitches, K.2" (or similar stitches), the stitch on the right-hand needle, after casting off, is counted as one stitch.

IMPORTANT—DYE LOTS! Always buy enough of the same dye lot at the one time for a complete garment, as a variation between dye lots can occur. **Retain ball bands** until the garment is completely knitted, and, in the event of an enquiry concerning the purchase, submit all ball bands.

KNITTING TENSION TEST

Take the needles and yarn specified in the instructions, cast on 20 stitches and knit a square in stocking stitch. Check the tension **very accurately** by placing an inch tape or rule along the stitches—marking the inch (or inches) with pins and counting the number of stitches to the inch or inches. If you get too many stitches to the inch your tension is too firm—try a size larger needle. If you get too few stitches to the inch your tension is too loose—try a size smaller needle.

Before you wash your garments, it is most important that you read the "Washing, Drying and Pressing" recommendations on page 18.
